WHAT'S

What is Ocuport

AI that builds full decks

Replace images

Swap any photo instantly

Image library

Stock photos built in

AI visuals

Generate what you imagine

Standout features

Edit, theme, and export

Start creating

Your first deck awaits

inside

Ocuport

One prompt, one polished deck. Ocuport generates on-brand slides with real content, then hands you full control to edit every pixel — text, images, layout, and style.

Images

Great presentations live and die by their visuals. That is why Ocuport gives you three fast ways to get the perfect image onto every slide — replace, browse, or generate. Let us show you each one.

Replace

Double-click any image on your slide and swap it with a file from your computer. The new photo drops into the exact same frame — size, position, and border stay put. No re-layout required.

Library

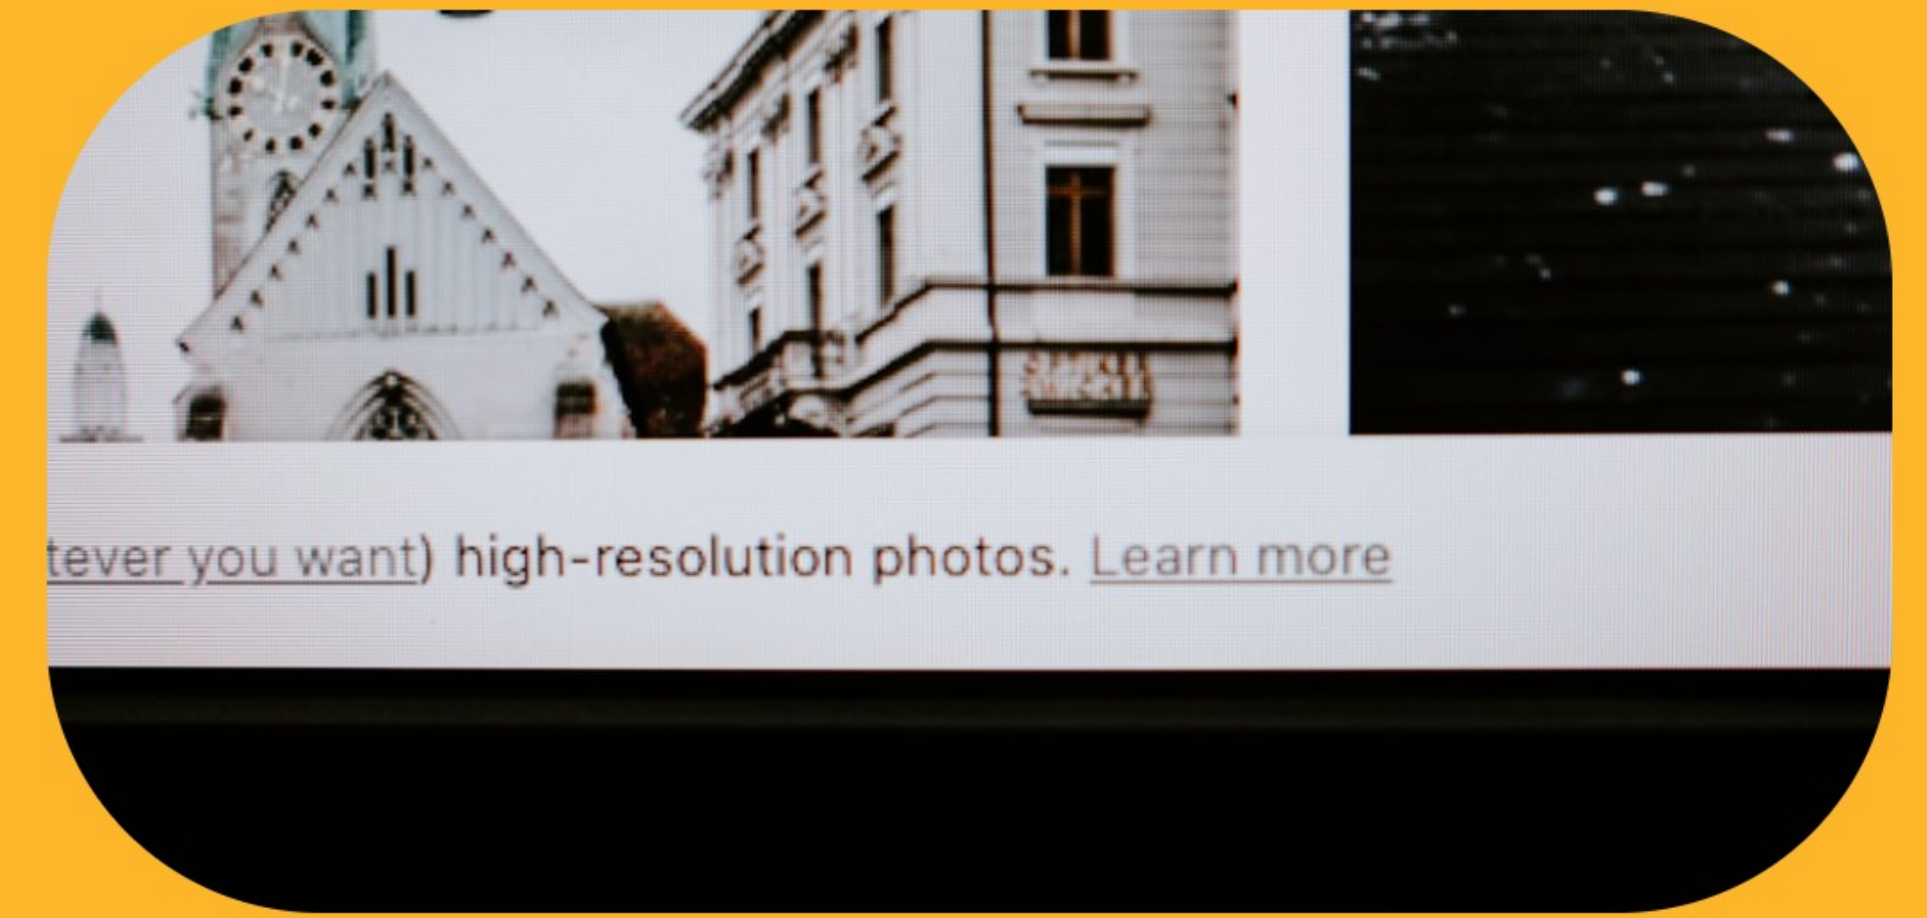

Search

Type a keyword and browse curated stock photos.

Select

Click the image you like from the results grid.

Place

It lands on your slide, styled and ready to go.

AI Visuals

Cannot find the right photo? Describe what you need in a few words and Ocuport generates a custom image on the spot. No external tools, no downloads — type a prompt and watch your slide come to life with a one-of-a-kind visual created just for your deck.

Power

Beyond images, Ocuport packs serious creative firepower into every corner of the editor.

Full deck from one line

Type a single sentence and Ocuport generates a complete, structured deck with content, layout, and images ready to present.

Drop in a slide

Need one more slide mid-deck? Tell the AI what you want and it inserts a new, fully designed slide right where you need it.

Edit everything

Drag, resize, restyle any element on the canvas. Change fonts, colors, and spacing until the slide feels exactly right.

Toolkit

Themes

Pick a ready-made color palette.

Templates

Start from polished slide designs.

PPTX Export

Download an editable PowerPoint file.

Sources

Every data claim cites its origin.

Notes

AI writes speaker notes for you.

PDF Export

Share a clean, print-ready document.
